# 15 DAY PUBLIC NOTICE

Date: February 27, 2001

Comment Period Ends: March 14, 2001

File Number: 2001-00368

In Reply Refer To: Michael J. Elliott

**Rhode Island - Department of Environmental Protection; Mosquito Abatement Section; c/o Alan D. Gettman; Stedman Government Center; 4808 Tower Hill Road; Wakefield, Rhode Island 02879; has requested a Corps of Engineers permit under Section 404 of the Clean Water Act** to place fill in a salt marsh as part of a mosquito control project in Allin's Cove (Drown Cove) salt marsh. This project to reduce mosquito breeding in existing depressions will use Open Marsh Water Management techniques. The project is located north of Willow Way in Barrington, Rhode Island. The proposal is described below and shown on the attached plans:

- Excavate four channels (total of 70 linear feet x 1.5' wide) to connect four depressions with channels to allow fish that eat mosquito larvae to access the depressions.
- Excavate one fish reservoir (6' x 10') to benefit the fish.
- Fill five small depressions (total of 104 square feet) to reduce mosquito breeding habitat
- A total of 8.7 cubic yards (c.y.) will be excavated with 2 c.y. used to fill the five small depressions and 6.7 c.y. spread on the upland disposal site located to the south.

The project will impact approximately 269 SF (0.006 acre) of Essential Fish Habitat (EFH) - see attached sheets 3 and 4 for a list of the species and life stages. Loss of this habitat may adversely affect these species by eliminating 269 SF of habitat. However, the District Engineer has made a preliminary determination that the site-specific adverse effect will not be substantial. Further consultation with NMFS regarding EFH conservation recommendations is being conducted and will be concluded prior to the final decision.

The project site is at UTM coordinates N4623700 and E304700 on the USGS Bristol, Rhode Island quadrangle sheet.

To properly evaluate the proposal, we are seeking public comment. Anyone wishing to comment is encouraged to do so. Comments should be submitted in writing by the above date. If you have any questions, please contact Michael Elliott at (978) 318-8131 or use our toll free number (800) 343-4789 or (800) 362-4367 if calling from within Massachusetts. You may also e-mail Mr. Elliott at [michael.j.elliott@usace.army.mil](mailto:michael.j.elliott@usace.army.mil).

Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider the application. Requests for a public hearing shall specifically state the reasons for holding a public hearing. The Corps holds public hearings for the purpose of obtaining public comments, when that is the best means for understanding a wide variety of concerns from a diverse segment of the public.

SEE NEXT PAGE FOR  
DETAILS OF EVALUATION  
FACTORS

Robert J. DeSista  
Chief, Permits & Enforcement Section  
Regulatory Branch

The decision whether to issue a permit will be based on an evaluation of the probable impact of the proposed activity in the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit which may reasonably accrue from the proposal must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered, including the cumulative effects thereof; among those are: conservation, economics, aesthetics, general environmental concerns, wetlands, cultural value, fish and wildlife values, flood hazards, flood plain value, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food production and, in general, the needs and welfare of the people.

Where the activity involves the discharge of dredged or fill material into waters of the United States or the transportation of dredged material for the purpose of disposing it in ocean waters, the evaluation of the impact of the activity in the public interest will also include application of the guidelines promulgated by the Administrator, U.S Environmental Protection Agency, under authority of Section 404(b) of the Clean Water Act, and/or Section 103 of the Marine Protection Research and Sanctuaries Act of 1972 as amended.

Based on his initial review, the District Engineer has determined that little likelihood exists for the proposed work to impinge upon properties listed in, or eligible for listing in, the National Register of Historic Places, and no further consideration of the requirements of Section 106 of the National Historic Preservation Act of 1966, as amended, is necessary. This determination is based upon one or more of the following:

- a. The permit area has been extensively modified by previous work.
- b. The permit area has been recently created.
- c. The proposed activity is of limited nature and scope.
- d. Review of the latest published version of the National Register shows that no presence of registered properties listed as being eligible for inclusion therein are in the permit area or general vicinity.

Pursuant to the Endangered Species Act, the District Engineer is hereby requesting that the appropriate Federal Agency provide comments regarding the presence of and potential impacts to listed species or its critical habitat.

The initial determinations made herein will be reviewed in light of facts submitted in response to this notice.

The following authorizations have been applied for, or have been, or will be obtained:

- (X) Permit, License or Assent from State.
- ( ) Permit from Local Wetland Agency or Conservation Commission.
- (X) Water Quality Certification in accordance with Section 401 of the Clean Water Act.

The States of Connecticut, Maine, Massachusetts, New Hampshire and Rhode Island have approved Coastal Zone Management Programs. Where applicable the applicant states that any proposed activity will comply with and will be conducted in a manner that is consistent with the approved Coastal Zone Management Program. By this Public Notice, we are requesting the State concurrence or objection to the applicant's consistency statement.

All comments will be considered a matter of public record. Copies of letters of objection will be forwarded to the applicant who will normally be requested to contact objectors directly in an effort to reach an understanding.

**THIS NOTICE IS NOT AN AUTHORIZATION TO DO ANY WORK.**
